****Disclaimer:** *Marble is a product of nature, variations of color and shape should be anticipated. Samples represented in this brochure are for preliminary color selection only. In addition, samples contained in hard sample kits are mass-produced using a technique dissimilar from that used on jobsites. Samples may not match exactly or may have a different finish.*

Please note: *Samples in this brochure are finished with a 100 diamond grit polish.* Terrazzo can be finished using several techniques, some considered “Special Finish.” Such finishes can result in additional labor and cost. The NTMA recommends 120 grit stones for fine grinding, although deeper colors can be achieved with additional grinding using higher grit stones. When selected, designers must indicate the use of a “Special Finish” plate in their specifications. Such finishes may also decrease the inherent slip resistance of the terrazzo floor. Terrazzo smoothness and gloss will vary depending upon the degree of finishing and polishing specified. Price adjustments should be expected for higher degrees of finishing. (Additional information and industry guidelines at www.ntma.com)

K-Poxy® Epoxy Terrazzo System- Your “Green” Floor Choice

U.S. Green Building Council awards LEED® points. For more information, please visit www.usgbc.org.

MRcr5 Local Regional Materials Credit (2 points possible) Materials in this brochure are extracted, processed, and manufactured regionally.

IDcr1 Innovative Design Credit (1 point possible) Some Terrazzo floors qualify as “exceeding Life Cycle Analysis” and may contribute to Innovative Performance under the USGBC.

MRcr4 Recycled Content Credit (2 points possible) Recycled aggregate such as glass can contribute to this credit.

IEQcr3 Indoor Environmental Quality (1 point possible)

IEQcr4 Low-Emitting Materials (1 point possible) K-Poxy® Epoxy Terrazzo System components are zero VOC (Volatile Organic Compounds)
